Please create Database schema in your SQL Server instance for any one of the following scenarios.

Scenario1:

Education Institution

1. There are 6 classes from 5 to 10 in Technovert Institute of Technology
2. Each class has a Class teacher teaching only 1 subject daily
3. They have 6 periods for 6 different subjects taught by 6 different teachers each day
4. Each teacher has a subject for each class
5. Each class has 6 students

Maintain Timetable for each class
Maintain the attendance record for each period

Scenario2:

Cricket Tournament

1. Contesting for Technovert Cup, there are 2 teams.
2. Each team has 15 players of which 4 are extras
3. A player can only be either a Bowler or a Batsman or a Keeper
4. Each team has one captain
5. The teams will be playing 3 matches with 11 players per team

   Maintain
   ✓ Result of the match
   ✓ Man of the match
   ✓ Date of play
   ✓ Playing 11 for each team in the match.

Your database should be extensible enough where possible and you should have a logical reason for your designs.
